EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

Claims 2, 8-18, 21-23 and 25 has been canceled. In response to the examiner's request for election/restriction, applicants elected without traverse (Response To Restriction Requirement: 1/21/2004), and as a result, claims 2, 8-18, 21-23 and 25 (non-elected claims) were canceled to place the case in condition for allowance.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The present application relates to a hybrid-type moving picture coding system for performing s motion compensating process and an orthogonal transforming process for each block obtained by dividing an input image into a plurality of blocks. The prior art of record fails to anticipate or render obviousness a moving picture encoder, which divides an image in each frame of moving picture into a plurality of blocks and performs an encoding process on each block, comprising: a coding unit performing an intra-frame coding process or an inter-frame coding process on given data; and an information amount reduction unit reducing an amount of information about given data, wherein for a plurality of consecutive frames containing a first frame. The coding unit performs the

intra-frame coding process on each block, and said information amount reduction unit reduces an amount of information about data coded by said coding unit; and for frames subsequent to the plurality of frames, said coding unit adaptively performs the intra-frame coding process or the inter-frame coding process on each block. It is further noted that, the present invention intra-frame codes several frames. Once these frames are coded, for the subsequent frames, the present application adaptively performs intra-frame or inter-frame coding or the present application performs switching between intra-frame and inter-frame encoding, selectively. That is the adaptive coding is between intra and inter-frame coding as specified in claims 1, 20, 24, 26, 27-28. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nhon T Diep whose telephone number is 703-305-4648. The examiner can normally be reached on m-f.
